

DIPARTIMENTO DI CHIMICA INDUSTRIALE
"TOSO MONTANARI"

Bologna, December 2nd, 2013

To whom it may concern

Dr. Elena Chugunova developed her postdoctoral research "Coupling reactions between aromatic neutral supernucleophiles and superelectrophiles: a new approach of creation of new generation medical preparations" and worked under the supervision of Dr. Carla Boga in the period between 4th of September and 2nd of December in Department of Industrial Chemistry "Toso Montanari", Alma Mater Studiorum-University of Bologna, Italy.

Elena has been well integrated into my research group and she has demonstrated to be a keen chemist with an enthusiasm for the research, diligent and hard-working.

In addition, she has the ability to adjust to accommodate the changing nature of a research project.

I am very happy to say that Elena has been among my best collaborators.

Best Regards

Carla Boga, PhD.
