

Whether you are willing to continue your higher education or to obtain your doctorate, this section will provide you with information and guidance to think about how you can manage your further science career.

Our postgraduate programs are of the highest caliber because we believe in the transformative power of ideas.

The postgraduate programs will develop skills in spheres of engineering and chemistry at an advanced level and will also enhance professional standing and status and career advancement prospects.

We appreciate the exchange of ideas, cultural understanding, and breadth of knowledge that result from international study. With new international programs which let us exchange our experience with graduates and scientists from many other countries, our faculty and students engage in intellectual discovery all over the world. The University doors are open for anyone who is sure it's his/her vocation to research and develop.
